SUMMARY

Over eight years across communications, relationship marketing and CRM, working with large consumer bases. I took a 50,000-person list from a 2% to a 25% open rate and structured the recurrence journey of a party that grew from about 500 to up to 3,000 attendees per edition. My work is to think in language and behavior, because they are timeless in the customer journey. That is the measure I use to secure the relationship.

EXPERIENCE

Retention Method Study

Leea | São Paulo, SP | Oct. 2025 – Present

- Developing a retention study that reads the signals preceding cancellation across four layers: behavior, brand voice, semiotics and time spent in each journey state.
- Specifying AI agents to detect cadence deviations, language recurrences and response patterns to visual elements, cross-checking readings before triggering an alert or recommendation.
- Defining a brand voice document as a stability reference for communication across the customer lifecycle.

CRM & Lifecycle Marketing Specialist

Fênix Educação | São Paulo, SP | Jul. 2022 – Sep. 2025

- Took a 50,000-lead base with compromised deliverability and hygiene from a 2% to a 25% open rate by diagnosing the root cause and rebuilding segmentation, list cleaning and send cadence.
- Increased enrollments by 20% in about 2 months on the same base by implementing behavioral lead scoring and journey-stage nurturing.
- Moved KPI reading from a monthly report into a routine by building Power BI dashboards for capture, engagement, conversion, churn, LTV and recurrence that came to guide leadership's campaign prioritization.
- Brought in-house work that depended on other teams' queues by specifying AI agents and a multi-LLM flow for triage, copy production and reporting.
- Reduced unqualified leads by 30% at the MQL to SQL handoff by standardizing forms and scoring criteria and closing a handoff SLA with Sales, making the pipeline predictable and giving time back to the sales team.
- Raised average email CTR by 35% by running structured A/B tests on subject lines and offers and refining segment selection each send cycle.
- Operated the end-to-end journey in Mautic and RD Station, with WordPress integrations and capture, routing and reporting workflows in n8n.

Strategic Partnerships Analyst

Legião da Boa Vontade (LBV) | São Paulo, SP | Apr. 2021 – Jul. 2022

- Grew top-of-funnel acquisition by 15% by designing co-branded campaigns with influencers and celebrities and converting borrowed reach into an owned, segmentable base, with no paid media spend.
- Funded the period's promotional projects with cash and in-kind B2B sponsorships by building a corporate partnership funnel from scratch, covering prospecting, proposals and contracts.
- Sustained active-base retention by creating partner-sponsored exclusive benefits and defining per-partner KPIs and tracking parameters to guide renewals.

Communications & Branding Manager (Contractor)

Monchu Agenciamento, Editora e Eventos | São Paulo, SP | Mar. 2016 – Apr. 2019

- Structured the recurrence journey of a party whose average attendance grew from 300 to 500 people per edition to 2,000 to 3,000 in about two years, using an RFM score (frequency, average ticket, recency), stage-based offers and satisfaction and quality surveys that informed venue layout; helped plan a festival edition with 8,000 attendees.
- Increased bar sales by 15% to 20% by cross-referencing ticket validation times with entry and exit tracking and adjusting event hours to the audience's actual stay pattern, making better use of each edition's investment.

- Built the operation's CRM infrastructure from scratch by integrating the ticketing database with Google Sheets and Mailchimp and tracking multi-year purchase behavior as input for segmentation.
- Grew organic reach by 150% by aligning offline activations from a team of 15 to 20 promoters to a single content calendar.

Telemarketing Coordinator

Legião da Boa Vontade (LBV) | São Paulo, SP | 2005 – 2012

- Increased new donors by about 25% and average ticket by about 20% through SPIN Selling and ongoing coaching, and cut turnover by about 40% in an operation of more than 40 agents.
- Improved productivity by about 15% and AHT by about 30% by setting up feedback rituals and monitoring critical conversion KPIs in CRM and Excel.

SKILLS

- **Journey and segmentation:** journey design for leads, active customers and post-sale; satisfaction and quality surveys by stage; advanced segmentation and SQL for segment building and list extraction.
- **Monitoring and diagnosis:** structured tracking of KPIs and targets, deviation reading, root-cause investigation, hypothesis building and turning diagnosis into action plans with measured results.
- **Recovery and retention:** list hygiene and deliverability, RFM modeling, lapse windows, re-engagement flows, cross-sell and upsell opportunity identification.
- **Experimentation:** A/B testing of subject lines, offers and segment selection, with result reading and rollout decisions.
- **Channels and automation:** email, WhatsApp, SMS and push in RD Station, Mautic, Mailchimp and HubSpot; integrations and workflows in n8n, Make and Zapier.
- **BI and data:** Power BI, Google Analytics, SQL, Excel and Google Sheets for conversion, churn, LTV and recurrence dashboards.
- **Applied AI:** specification of AI agents and multi-LLM flows for triage, copy production and reporting.
- **Continuous improvement and collaboration:** workflow reviews based on recurring issues, SLAs and campaign governance with Sales, CS, Content and Data.

EDUCATION

B.A. in Languages and Literature, Portuguese and English | Pontifical Catholic University of São Paulo (PUC-SP) | 2015
