SUMMARY

CRM & Lifecycle Marketing specialist with 8+ years of experience structuring end to end relationship journeys, multichannel automation and advanced segmentation. Skilled in database management, lead scoring, defining Marketing/Sales SLAs and monitoring health metrics (LTV, Churn Rate, NRR) through Power BI dashboards. My track record combines leading teams of 15 to 40 people with CRM applied to the cultural industry, from ticketing databases to student journeys. At Leea, I lead agentic architecture, temporal event analysis and decision governance applied to retention, turning behavior and language into testable CRM decisions.

SKILLS

- **Database management & segmentation:** data hygiene, quality control, advanced segmentation and SQL queries to build segments and pull send lists.
- **Lifecycle journeys:** building relationship flows for leads, active customers and post-sale, focused on retention and LTV.
- **Multichannel automation:** building and optimizing flows via RD Station, Mautic, Mailchimp.
- **Language applied to CRM:** brand and behavior reading converted into journey hypotheses, copy and structured A/B testing.
- **Engagement intelligence:** behavioral lead scoring, targeted nurturing and identifying retention, cross-sell and upsell opportunities.
- **Metrics & dashboards:** tracking open rate, CTR, conversion, churn rate, LTV and recurrence via Power BI and Google Analytics.
- **Marketing/CS/Sales alignment:** defining handoff SLAs, campaign governance and process QA for pipeline predictability.
- **Analytics tools:** Power BI, Google Sheets, Excel, Google Analytics, SQL.
- **Applied AI & MarTech:** generative AI, agent specification, prompt and token optimization, Make automation, agentic flow design and custom CRM integrations.
- **Decision architecture:** events, episodes, intervals, patterns, ruptures, client-calibrated thresholds, human governance and retention intervention design.

EXPERIENCE

CRM & Lifecycle Marketing Specialist · Founder

2026 – present

Leea | São Paulo, SP

- Lead the customer trajectory-reading architecture, crossing commercial, communication, behavioral, contextual and language events to surface patterns, ruptures and actionable retention hypotheses.
- Specify agents and decision policy: versioned reading lenses, client-calibrated thresholds, escalation rules and human governance over model output.
- Structure the calibration loop with baseline, control group and validation criteria, keeping explicit what has been tested and what remains a hypothesis.
- Build and maintain the in-house journey tooling: a twelve-rule YAML lifecycle linter, an agent that turns product events into lifecycle journeys, and a regression harness running 25 cases in continuous integration.
- Apply LLM engineering to CRM: multi-LLM flows, prompt and token optimization, routing and validation in code, with a bounded correction loop and auditable output.

CRM & Lifecycle Marketing Specialist

Jul 2022 – Sep 2026

Fênix Educação | São Paulo, SP

- Grew enrollment by 20% on a 50,000 lead base in ~2 months, with behavioral lead scoring and funnel stage nurturing.
- Inherited a base with a ~2% open rate and poor hygiene and deliverability, and raised it to ~25% by rebuilding segmentation, hygiene and cadence.
- Cut unqualified leads by 30% in the MQL to SQL handoff, standardizing forms and scoring and locking in SLAs between Marketing and Sales, which gave the pipeline predictability.
- Automated multichannel flows (email, WhatsApp, push, SMS) via Mautic, RD Station and WordPress integrations, plus workflows (lead capture and distribution, communication, AI integrations, reporting) via n8n, Make and Zapier.
- Raised average email CTR by 35% and built capture, engagement and conversion dashboards in Power BI, tracking churn rate, LTV and recurrence metrics to support leadership's strategic decisions.

- Upgraded CRM tasks with AI agents; built a multi-LLM flow with Claude and prompt optimization in Gemini; scheduled weekly research runs in Perplexity.

Strategic Partnerships Analyst

Apr 2021 – Jul 2022

Legião da Boa Vontade (LBV) | São Paulo, SP

- Accelerated data driven user acquisition by 15% through co-branded campaigns with high profile influencers and celebrities, expanding the top of funnel marketable database.
- Built and managed an end to end corporate partnership funnel, securing high value monetary and in kind B2B sponsorships to fund major promotional projects.
- Led cross functional collaboration between external corporate executives, talent agencies and internal creative teams to launch unified, multichannel promotional campaigns.
- Established campaign KPIs and tracking parameters to evaluate partner performance, analyzing audience reach and media value to optimize future collaboration strategies.

Communication & Branding Manager

Mar 2016 – Apr 2019

Monchu Agenciamento, Editora e Eventos Ltda | São Paulo, SP

- Developed a custom CRM and customer retention pipeline integrating external ticketing databases with Google Sheets and Mailchimp to track multi year behavioral data.
- Built an actionable RFM framework to monitor customer event frequency and lapse windows, launching re-engagement flows that scaled event attendance by 500% (from 500 to 3k+).
- Analyzed behavioral event metrics, including precise check in and check out times, to optimize event planning and improve long term community loyalty.
- Overhauled the field marketing infrastructure by recruiting, hiring and leading a team of 15 to 20 selected promoters for niche audience acquisition and sales performance.
- Orchestrated an omnichannel content strategy, aligning online and offline promoter activations with a unified calendar that expanded organic digital reach by 150%.

Telemarketing Coordinator

Jul 2005 – Mar 2012

Legião da Boa Vontade (LBV) | São Paulo, SP

- Increased new donor volume by 25% and average ticket by 20% applying the SPIN Selling methodology, with continuous sales coaching for a 40+ operator team.
- Optimized productivity by 15% and improved AHT by 30%, structuring feedback rituals and monitoring critical KPIs (CPC, conversion rates) via CRM, Excel and Power BI.
- Reduced turnover by 40% by implementing a humanized leadership culture and accelerating new hire onboarding through technical workshops and process playbooks.
